

Bracket

Neutral Wire

Preformed Line Products' Neutral Wire Brackets can be ordered in either Aluminum Alloy or Hot Dipped Galvanized Steel. Non-insulated neutral wire brackets are used on rural lines. Both types accommodate up to 1/2" or smaller neutral wires that are tied into the groove. Neutral wire brackets are tested to CSA-C83 specifications

A 5/8" lag or through bolt is required to attach the bracket to the pole.

Standard Package 50

Catalogue Number	Description
T-NWB-5	Galvanized Steel
T-NWB-5A	Aluminum Alloy
