

Fitting

Sidewalk Guy

Preformed Line Products' Sidewalk Guy fittings are available in either Heat-Treated Aluminum Alloy or Galvanized Ductile Iron. Sidewalk Guy fittings are used with 2" and 2½" IPS galvanized steel pipe. (Not Included)

The pole fitting, catalogue number T-SWG-20B (D or A) is curved to fit the pole and is secured using four ½" lag bolts. Pole fittings with an 11/16" diameter hole for a 5/8" machine bolt are available upon request.

The guy end fitting catalogue number SWG-20C (D or A) includes a catalogue number R-1008 guy clamp which accommodates single or double guys from ¼" to 3/8". When only one guy is used place a short piece of strand in the second groove of the clamp. Sidewalk guy fittings are tested to CSA-C83 specifications.

Both fittings are secured to the pipe with a setscrew.

Standard Package 10
